Paterson, New Jersey 07524

To Whom It May Concern:

We are in seventh grade at Bridgewater-Raritan Middle School, located in Bridgewater, New Jersey. We are currently researching energy alternatives for a Language Arts project. While we were researching, we noticed the importance of energy alternatives, and we decided to ask you for help.

The problem is that people aren't recognizing the fact that the energy resources they're using are running out. For example, people are wasting too much gasoline (one of the non-renewable energy resources) on cars and other forms of transportation. Instead, we can all use more abundant and renewable energy resources like solar, wind, and hydroelectric energy, but nobody is willing to make the change. Even though they cause some problems, these alternatives are less harmful than the resources we are using currently.

We would like to encourage you to please help us by installing solar panels on our school's rooftops. We want this because it would make the idea of energy alternatives more popular in New Jersey. This will also help you because it will make your company better known in our world. This way, everyone can profit from energy alternatives.

We would like to thank you for your time and cooperation.

Sincerely,

Olivia and Haran
